

13 April 2017

Time:

+12:45pm

Duration:

+15 minutes

Present:

- Anna Borysova
- Shaheel Kooverjee
- Erin Versfeld

Excused:

None. This was a team meeting, therefore Assoc. Profs. Moodley and Gain were not expected to attend.

Summary:

- The team confirmed that they were all on the same page with regards to the meeting with D
- The team commented that it would be difficult to use the same dataset for all three devices
- The team split up the 3 devices:
 - A - Leap Motion Controller
 - S - Kinect
 - E - Myo

Next meeting:

23 April 2017

Points of Action for next meeting:

- The team members would have found relevant datasets for their devices
 - SASL alphabet and device specific
- The team members would each have found a few relevant papers for their respective literature reviews
- The team members will decide on the minimum number of algorithms which they will look for
- Clarify what D meant by using the same dataset (i.e. maybe he meant the same gestures, like the alphabet, rather than done by the same people etc)
- Plan when to begin developing datasets
- Plan when to have drafts for literature reviews ready

Discussion:

See Summary.
