24 April 2017

Time:
2 pm

Duration:
+-45 minutes

Present:
- Anna Borysova
- Shaheel Kooverjee
- Erin Versfeld

Excused:
None. This was a team meeting, therefore Assoc. Profs. Moodley and Gain were not expected to attend.

Summary:
Lit review is the major focus from here on out.

Next meeting:
Online collaborative review, Wednesday 3

Points of Action for next meeting:
- Ask whether we should record one of us, or all three of us?
- Should we vary data, or just algorithms? Maybe phase 2.
- Do literature reviews
- Formalise experimental setup
- Investigate which letters we should use

Discussion:
- Came up with an approximate environmental set-up
  - Same conditions, all devices measuring simultaneously
  - Make sure that devices and equipment can't interfere with each other
  - Lab vs natural
- A phase 2
  - Clarified
  - Combine devices, possibly algorithms
- Going to look for 3 - 5 algorithms and see how far we get
  - Look to see if Kinect and Leap algorithms overlap
  - Look into how to preprocess/ clean data
- Drafts to be ready by next Wednesday, latest
- Have to wait for James to start data collection
